Education

ABV-Indian Institute of Information Technology and Management

Aug 2023 – Present

Integrated B.Tech + M.Tech in Information Technology

CGPA: 8.45

- **Relevant Coursework:** Data Structures and Algorithms, Operating Systems, Database Systems, Computer Networks, Object Oriented Programming, Compiler Design, Artificial Intelligence, Graph Theory

Technical Skills

Languages: C++, Python, JavaScript

Frontend: React.js, HTML5, CSS3, Tailwind CSS, Bootstrap

Backend: Node.js, Express.js, REST APIs, JWT Authentication

Databases: MongoDB, PostgreSQL, MySQL

Cloud & DevOps: AWS, Google Cloud Platform (GCP), Vercel, Cloudflare

Tools: Git, GitHub, Postman, Prisma

Projects

ABV-IIITM Semester Registration System

Apr 2026 – May 2026

React.js — Node.js — Express.js — MongoDB — JWT — REST APIs

Live | GitHub

- Developed a **scalable full-stack web application** for **500+** users with role-based authentication (JWT) and secure session management.
- Designed and implemented **multi-stage approval workflows** improving registration validation accuracy by **70%**.
- Built **dynamic course allocation system** with credit validation, backlog handling, and real-time constraint enforcement.
- Created **RESTful APIs** for student, faculty, and admin modules ensuring modular and maintainable architecture.
- Automated **PDF generation and document workflows**, reducing manual processing time by **60%**.

BizNova – AI-Powered Business Intelligence Platform

Oct 2025 – Nov 2025

React.js — Tailwind CSS — Node.js — Express.js — MongoDB — Google Gemini API

Live | GitHub

- Engineered an **AI-powered SaaS platform** enabling retailers to manage **sales, inventory, CRM, and expenses**, reducing manual workload by **90%**.
- Integrated **Gemini API (Google)** for **natural language processing (NLP)** and voice commands, automating real-time business operations.
- Developed **predictive analytics models** for demand forecasting, revenue optimization, and expense tracking using historical datasets.
- Built a **real-time order management system** with inventory validation and automated synchronization between customer and retailer modules.
- Implemented **image processing pipeline** for bill scanning and inventory updates, saving **2+ hours per day** for users.

Achievements

- Winner, **AI for All Hackathon 2026** at India AI Impact Summit (Top 1% of participants).
- Top Performer, **HACKSAGON 2026** among **2600+** teams nationwide.
- Finalist, **OpenAI x Nxtwave Buildathon 2025** for AI-based product innovation.
- Rank **1578**, CodeFest'25 (National Competitive Programming Contest).

Problem Solving & Competitive Programming

- Solved **300+** **DSA problems** covering arrays, graphs, dynamic programming, and greedy algorithms on **LeetCode**.
- Active competitive programmer on **CodeChef** (Division 3), focusing on algorithm optimization and time complexity reduction.

Certifications

- **AI for All Hackathon (2026):** View Certificate
- **HACKSAGON (2026):** View Certificate
- **Google Cloud Certification – 2025:** View Certificate
- **Oracle Cloud Infrastructure AI Foundations Associate – 2025:** View Certificate
- **OpenAI x Nxtwave Buildathon (2025):** View Certificate
- **Social Summer of Code (SSOC) – 2025:** View Certificate
- **CodeFest'25 – IICPC:** Secured **Rank 1578**. View Certificate
